Experience

EvolutionSoft Technologies | Backend Developer | C#, .Net, Entity Framework, MySQL, PostgreSQL, JWT Authentication, Postman

• Developed REST APIs applying Clean Architecture principles, SOLID, and clean code practices to ensure flexibility and maintainability.
• Structured systems with clear separation between domain, application, interface, and infrastructure layers, promoting high cohesion and low coupling.
• Collaborated with experienced developers to exchange knowledge and support continuous technical growth.
• Integration of AWS services, such as Amazon S3, for efficient and scalable file storage, implementing secure uploads, temporary URL generation, and access control through policies.
• Diagnosed and resolved issues in development environments, helping optimize application performance.
• Developed from the ground up the API for *Café Santo André*, one of the largest companies in Brazil's food sector.
I designed and implemented the backend architecture powering both the Backoffice panel and the E-commerce platform, significantly enhancing the company's valuation by delivering a high-performance, scalable, and clean API.

Technical Skills

Frontend: JavaScript, HTML, CSS, Bootstrap
Backend: Java, C#, C/C++, .Net, Entity Framework
Databases: PostgreSQL, MySQL
Security: JWT Authentication
Technologies and and tools: Docker, Postman, Dbeaver, Figma, Git, Github, Bitbucket

Projects

MoneyScope | C#, ASP.NET, Entity Framework, MySQL, Fluent Validation, Clean Architecture, JWT Authentication

MoneyScope is an intelligent personal finance management API designed to help users manage their finances in a practical and organized way. It allows users to record transactions, set financial goals, create custom categories, and generate financial performance reports.

• Registration and retrieval of financial transactions
• Setting savings goals
• Creation and management of custom categories
• Generation of financial performance reports
• User authentication and authorization
• Clean and scalable architecture
• Data validation with FluentValidation

Education

Faculty of Technology of Itapetininga (FATEC-ITA)   **Feb 2024 – Dec 2026**
Bachelor of Technology (CST) – Systems Analysis and Development
Academic Performance Index (API): 8.16 / 10.00
Relevant courses: Programming Logic and Algorithms, Object-Oriented Programming, Databases, Web Development, Mobile Development, Data Structures, Software Engineering, Operating Systems, Computer Networks, Artificial Intelligence, Information Security.

Languages – A1/A2: Basic user | B1/B2: Independent user | C1/C2: Advanced user

• **Portuguese:** Native Speaker (C2)
• **English:** Upper-intermediate B2 - (EFSET Certification: Listening C1, Reading C1, Writing B1, Speaking B2)
